SOUTH GREENLAND
Development Is Created Together

ABOUT US

South Greenland is everything from minimalist beauty with green fields and vegetation to magnificent snowy mountains and icefiords.

At Innovation South Greenland A / S, we work to promote new business opportunities though partnerships and clusters that can help develop this amazing place.

Our areas of expertise are fishing, agriculture, food innovation, minerals as well as great nature experiences for tourists.

BUSINESS

Innovation South Greenland A/S is the Single Point of Contact for companies what wants to do business in South Greenland. We are here to assist both locals and foreign companies.

ENTREPRENEURS

Innovation South Greenland A/S help entrepreneurs to explore approaches to creativity, innovation and entrepreneurial thinking that will help understand what's involved in setting up and running your own business.

We stay ahead of
the curve by
leveraging
creativity and
expertise.

FIND YOUR PARTNERS IN

FISHING

In South Greenland, our goal is to create more innovative initiatives to develop new products, create added value and thereby create more jobs.

AGRICULTURE

Climate change is creating new opportunities for agriculture and forestry in Greenland.

FOOD INNOVATION

Whether it is land-based or sea-based food. Our goal is to put Greenland on the global food map. With the pristine pure nature, there is every opportunity to create unique and new food experiences.

TOURISM

South Greenland has a unique history, cities with exciting cultural offerings and hot springs on a remote island, big wall climbing, and fjord kayaking.

MINERALS

Minerals are the cornerstone of Greenland's economical development. Our goal is to accelerate the establishment of the mineral industry.
